

WINDOW AND DOOR

# 8000T/NT Series

Tilt-and-Turn Windows

Champion's 8000T Tilt-and-Turn windows are I-Strut, thermally-broken windows. Featuring either a 4 1/2" (8000T) or 2 7/8" frame depth(8000NT), the 8000T/NT provides the versatility to be able to be utilized in many applications. Both the 4 1/2" and 2 7/8" products feature fixed and operable units with equal sightlines. Champion's 8000T/NT windows have the highly functional combination of projected and casement inswing windows in a tilt-and-turn configuration. A simple turn of the handle in different directions will cause products to open in the desired way. Champion's 8000T/NT windows have structurally glazed sashes and pressure-equalized designs, both contributing to their performance. The functionality and versatility of Champion's 8000T/NT Tilt-and-Turn windows makes either of these products a great choice for new construction or rehabilitation jobs.
